Unit 3 -- Skeletal System Get ready to study the complete axial and appendicular skeleton of the human body. Our categories are divided into upper limbs, lower limbs, hand and foot, vertebrae and ribs, and finally we'll end with the skull.

### **McCullough, Anila / Unit 3 -- Skeletal System**

The unit starts by exploring the structure and function of the skeletal system which includes the different bones of the skeleton and the different types of joints. The muscular system is then studied, including the

### **UNIT 5 - MUSCULAR SYSTEM - BEHS Science**

The aim of this unit is to give learners a detailed understanding of the structure and function of the skeletal, muscular, cardiovascular, and respiratory systems. Teaching the structure and function of the skeletal system will require the use of diagrams of the skeleton

### **Unit 1: Anatomy for Sport and Exercise - Edexcel**

SKELETAL MUSCLE STRUCTURE Connective Tissue Components The highly specialized skeletal muscle cells, or muscle fibers, are covered by a delicate connective tissue membrane called the endomysium (Figure 10-1). Groups of skeletal muscle fibers, called fascicles, are then bound together by a tougher connective tissue envelope called the perimysium.
